## EXPERIENCE

General experience: 5 years (started with simple html + css + jQuery)

### SightQuest | NoLabel Hackathon

2024

NoLabel Hackathon is a seasonal hackathon where students from different universities come together to create a project and compete in three categories (Best Business Plan, Best MVP, Best Project Architecture).

As the team leader and front-end developer, I led a team that included a graphic designer and four programmers. We created a real-time active recreation game (a game of tag), using web sockets to track player movements and events, such as when someone is caught. Inspired by the "JetLag" series on YouTube, we developed the game in just 10 days and took first place in the MVP category.

**Tech Stack:** React Native, Django. My responsibilities primarily included developing the mobile application, building the game architecture, protocol, and ensuring the team's effective performance.

### DevM8 | Event Manager & Analytics Service

2024

The event management and analytics system is closely integrated with Telegram. It allows clients to publish events, sell tickets, and perform custom actions upon payment (for example, adding a person to a group).

**Tech Stack:** C#, React (Vite). The application uses a hexagonal architecture, which significantly facilitated the expansion of DevM8's functionalities. We transitioned from analytics to full event management, and the code was very easy to modify, adhering to the principles of object-oriented programming.

### Bitfidel | Client-Broker Matching

2024

The system connects BTC brokers with clients, acting as an escrow. The platform provides full-featured admin and broker panels, allowing for manual customization of email templates, management of transactions, and brokers.

**Tech Stack:** C#, React (Vite).

---

## EDUCATION

- Bachelor's degree in "Software Development" | University of Information Technologies, Mechanics and Optics (Санкт-Петербург, 2022 - 2026)

ITMO University is one of the top public universities in Russia, and is ranked 78 in computer sciences in the [QS World University Rankings 2024](#).

---

## LANGUAGES (C2)

English • Spanish • French • Russian

## HOBBIES

Skate • Surf • SCUBA Diving (Rescue)

---

## SKILLS

Frontend-Development: TypeScript, React, React Native, jQuery, Tailwindcss

Backend-Development: C#, C++, NodeJS

Dev-Ops: Docker, Linux (CentOS, Ubuntu), Nginx, PostgreSQL, MongoDB, Github Workflows

Design: Figma, Adobe Illustrator
